

INFORMATION TO OFFERORS OR QUOTERS

SECTION A - COVER SHEET

Form Approved
OMB No. 9000-0002
Expires Oct 31, 2004

The public reporting burden for this collection of information is estimated to average 35 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to Department of Defense, Washington Headquarters Services, Directorate for Information Operations and Reports (9000-0002), 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person will be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

PLEASE DO NOT RETURN YOUR FORM TO THE ABOVE ADDRESS. RETURN COMPLETED FORM TO THE ADDRESS IN BLOCK 4 BELOW.

22 NSNs - Gas Turbines, Jet Engine and Components, Aircraft; Engine Electrical Systems Components, Aircraft; and Engine Air and Oil Filters, Strainers and Cleaners, Aircraft

The purpose of this solicitation is to provide worldwide support for the National Stock Numbers (NSNs) listed in Attachment 1. The NSNs on this solicitation were chosen based on the fact that they fall into the same World Wide Web Industrial Capabilities (WICAP) grouping. WICAP uses the Department of Commerce's North American Industrial Classification System (NAICS) to group items based on similar manufacturing processes. The NSNs are from the 2835, 2840, 2925 and 2945 Federal Supply Classes (FSC) and NAICS 336412.

The Government anticipates multiple awards under this solicitation.

For clarification purposes: When the term 'base year' is cited throughout this solicitation it is to be interpreted as 'base period' which consists of three years. The resultant contract(s) will have a three-year base period with two one-year option periods.

I. CONTRACT PERFORMANCE REQUIREMENTS:

A. Contract Type:

The contract(s) awarded will be Indefinite Delivery Indefinite Quantity type contract(s).

FAR Clause 52.216-22 (I71), Indefinite Quantity: The guaranteed minimum contract value is defined as 10% of the estimated value of the base period. The minimum contract value does not guarantee delivery orders for any particular item or group of items. The Government does not guarantee a minimum contract value for any subsequent option period.

For each award, the Government will compute a different guaranteed minimum contract value and maximum contract value for each contract awarded under this solicitation.

The guaranteed minimum contract values will be determined in accordance with the following formula:

10% of the estimated demand quantity (EDQ) for the NSNs on contract (base period only), computed as follows:

$$0.1 \times ([\text{NSN1 price} \times \text{EDQ}] + [\text{NSN2 price} \times \text{EDQ}] + [\text{NSN3 etc.}])$$

The maximum contract values will be determined in accordance with the following formula:

150% of the aggregated extended dollar value of the estimated demand quantity (EDQ) for the NSNs on contract. This calculation will apply to the base period as well as each option period, computed as follows:

B. Delivery Order Transmission:

Delivery Orders (DO) will be issued to the contractor either through the Paperless Ordering Placement System (POPS), Automated Delivery Order (ADO) System or by the issuance of Manual Delivery Orders.

1. POPS

If the Paperless Order Placement System is selected as the automation method to be utilized, in accordance with DSCAP Clause 52.211-9G33-POPS-Computer Compatibility, the contractor shall establish interface capability with DLA's Standard Automated Material Management System (SAMMS) and Defense Automated Addressing System (DAAS). These interfaces will be for purposes of sending and receiving EC/EDI transmissions, electronic invoices and/or receipt transactions processing, and establishing two-way communication for logistics and management information. The Contractor shall ensure adequate systems interfaces are used to integrate commercial systems with Government systems for the entire logistics trail.

The following three EDI transactions are required for the purposes of transmitting the DOs and Tracking Performance:

850 Purchase/Delivery Order
856 Shipment Notice Manifest
997 Functional Acknowledgement

The Purchase/ Delivery Order (850) will be processed through Defense Supply Center Richmond. The Functional Acknowledgement (997) will show that the contractor has received the delivery order and will establish the order issue date. The Shipment Notice (856) will identify the order shipment date of the total quantity. The Functional Acknowledgement and Shipment Notice will be used to track contractor performance.

2. ADO System

The utilization of the ADO System would require Internet capability to receive email notification that the delivery order was available on the Procurement Gateway.

3. Manual Delivery Orders

Manual delivery orders would be issued for contractors unable to utilize POPS or ADO. Manual orders will also be issued for any delivery order containing a first article testing requirement, government furnished tooling, or for other special or unique requirements.

C. Technical Requirements for Items Delivered:

Items shall be manufactured in accordance with Government technical data packages, drawings and specifications. The contractor may obtain technical data using a combination of the following websites:

<http://www.dscr.dla.mil/tdmd>. Contractors must have a membership number to access technical data packages. Contractors must follow the instructions provided on this website to obtain a membership number and technical data.

Military Specifications (MIL-SPEC) and Federal Specifications (FED-SPEC) can be downloaded from the following websites:

<http://assist.daps.dla.mil/online/start/> <http://assist.daps.mil> and/or <http://dodssp.daps.mil>.

The Contractor is responsible for notifying the Government immediately if the drawings or technical data is different from the information cited in the PID.

If OEM-owned tooling/forgings/castings are required in order to supply an item that conforms to the product item description in this solicitation, offerors must provide, as part of their offer, written proof that they have the right to use OEM-owned tooling/forgings/castings in the manufacture of this item. If you intend to make your own tooling/forgings/castings, please list these costs separately so that we may accurately assess the true unit cost of your end item.

D. Quality Requirements:

The contractor shall establish, implement, document and maintain a quality system that ensures conformance to all contractual requirements and meets

the requirements of ISO 9001:2000. However, the contractor may propose an equivalent quality system model. If the contractor chooses to propose an equivalent quality system, FAR Clause 52.246-11 (E5), Higher Level Quality Requirements must be completed.

A Quality Matrix is included at attachment 3. The quality matrix provides information to supplement the requirements stated in the PID, and in the event that a conflict exists between these documents, the PID data shall be the prevailing requirement. An appendix to the quality matrix is included at attachment 4. The appendix designates which contract clauses apply to each quality requirement and provides references to handbooks that decode various quality codes.

E. Packaging Requirements:

Attachment 5 includes procurement identification descriptions (PID) obtained from the Contract Technical Data File (CTDF). Refer to individual PIDs for specific packaging requirements.

F. Inspection Requirements:

The PID data in Attachment 5 contains the inspection requirements for each individual NSN. Full texts of Quality Assurance Provisions (QAPs) are available on the DSCR Master Solicitation, Section 2, at <http://www.dscr.dla.mil/qap/qaps.htm>.

G. Delivery:

The contractor shall deliver to the DLA Distribution depot as designated in each individual delivery order. The contractor shall ship ordered items on or before the contract delivery date which will also be specified in each individual delivery order. Delivery shall be FOB Destination. The Contractor shall consolidate shipments from the same source to the same destination whenever possible.

H. Surge and Sustainment:

Surge and Sustainment NSNs and quantities are identified in Attachment 2. Surge and Sustainment requirements are outlined in clauses 52.217-9G25 and 52.217-9006 in Section I, and in 52.217-9G27 in Section M. In the attachment, the individual quantity requirements for each month are identified as well as the total six-month requirement per NSN. 'Surge Support' is one of the evaluation factors; therefore, offerors are required to comply with the specific clauses/provisions.

The 6000 Series CLINs identify the surge quantity that may be ordered by the Government in a military contingency. The Government is not obligated to order any of the surge quantities and the contractor should not ship such quantities without receipt of an order clearly designated for surge quantities

II. SUBMISSION OF OFFERS

A. Pricing:

For each NSN offered, the Contractor is to provide pricing for the base period and option periods. Attachment 1 identifies the NSNs, maximum order quantities, minimum order quantities and estimated demand quantities for the base period and option periods. The Contractor is required to utilize the electronic (Excel Spreadsheet) version of Attachment 1, for use in the electronic submittal of pricing and for Government ease in the evaluation process.

Contractors are encouraged to consider minimum order quantities (MOQ) when setting prices. Contractors are not required to honor delivery orders for quantities less than the MOQ [see Clause I67, 52.216-19]. However, it is important to note that offers will be evaluated based on estimated demand quantity (EDQ) [see DSCAP Clause M12, 52.216-9G09]. The quantity estimates provided are based on the best projections available at the time of this solicitation and are subject to change. Some of the NSNs may have an EDQ of zero; however, these NSNs may not necessarily have zero demands.

They may, in fact, be items recently assigned to DSCR, or items for which historical data is otherwise incomplete or unavailable, or items for which the Government has no recurring demands and therefore, cannot forecast any realistic estimates.

B. Delivery

Attachment 1 provides the recommended delivery, represented in days, for each NSN. Offerors may propose delivery times that differ from the recommended delivery. Proposed delivery times will not be used in evaluating offers. The Contracting Officer may reject as unacceptable, without engaging in discussions, any offer whose proposed delivery time differs significantly from the recommended delivery time. In considering the difference, the contracting officer will consider, at a minimum, previous leadtimes from prior history of that particular NSN.

C. Surge and Sustainment:

Surge and Sustainment will be evaluated in accordance with DSCR 52.217-9G27 in Section M.

Offerors must identify investment costs, if any, to execute the surge plan. Reference DSCAP Clause 52.217-9G25 (I92K) and DLAD Clause 252.217-9006 (I89F). If no investment costs are necessary, state 'none.'

Investment Costs \$ _____

D. Surplus Offers:

Surplus offers will not be considered for award as it is unlikely that offerors will be capable of providing surplus material for the life of the contract.

III. EVALUATION OF OFFERS:

Offers will be evaluated on an NSN-by-NSN basis, with each NSN awarded to the offeror who represents the best value. The Government will base the determination of best value on a comparative assessment of the offerors' prices and past performance. Contractors may quote on as many NSNs as they have the capability to perform. No preference will be given to the number of NSNs a contractor quotes. As indicated in DSCR Clause 52.215-9G06, the award(s) will be made to the offeror whose proposal conforms to the terms and conditions of the solicitation and represents the best value to the Government.

A. Price Evaluation:

Each individual NSN will be evaluated by multiplying the contractor proposed unit price by the estimated demand quantity to arrive at the total estimated price for each NSN. In those cases where the EDQ is zero or less than the MOQ, the Government will use the MOQ to represent the evaluated quantity.

The total evaluated price for each NSN will be the sum of the total evaluated price for base period and option periods, plus any additional proposed costs to include First Article testing, Surge and Sustainment and other applicable non-recurring costs.

B. Past Performance Evaluation:

Past Performance will be evaluated in accordance with DSCR Clause 52.215-9G05.

NOTE: This solicitation includes the attachments listed below which should be downloaded from the following DSCR website:
<http://www.dscr.dla.mil/kd>. The Contractor is highly encouraged to submit unit pricing in an electronic format (Excel Spreadsheet) for Attachments 1 and 2, either through e-mail or on a disk to help expedite the evaluation process.

- Attachment 1: Pricing Worksheet (Excel Spreadsheet)
- Attachment 2: Surge and Sustainment Price Sheet (Excel Spreadsheet)
- Attachment 3: Quality Matrix (Excel Spreadsheet)
- Attachment 4: Appendix to Quality Matrix

FOR D001450000 PALLETIZATION REQUIREMENTS.

For all shipments of packaged materiel to the government, which includes either depot (DLA-direct) or DVD (customer-direct) shipments, both DoD linear and 2-D bar code markings are required on military shipping labels in accordance with MIL-STD-129, revision P, dated December 15, 2002, as amended by Change Notice 1, dated January 15, 2004. 2-D bar coding shall be in accordance with ISO/IEC 15438, ISO/IEC 15434 (ANSI MH10.8.3) and DoD 4500.9-R. MSL linear (code 3 of 9 or code 39) bar coding shall be in accordance with ISO/IEC 16388. MSL label stock quality shall meet MIL-PRF-61002. MSL bar code print quality shall meet ANSI MH10.8-2000 or ANSI X3.182-1990 (R2000) for applicable 2-D and/or linear bar codes. All DVD shipments shall meet additional linear bar coding requirements in DLAD 52.211-9008. When the contract/order omits any data element required to be bar-coded, the field shall be zero-filled. These requirements do not apply to delivery orders when the basic contract has not been modified to require MIL-STD-129P. If there are inconsistencies between the schedule

B12 9-5 FIRST ARTICLE DELIVERY
UNDER INDEFINITE
DELIVERY CONTRACTS
DSCR (MAR 1999)

B21B 11-9 POPS - PRODUCT INFORMATION:
DSCR (JAN 1996)

Offerors are required to provide the following information regarding the items offered:

MANUFACTURER'S NAME

PART NUMBER/CATALOG NUMBER

Offerors shall write/type this information on the schedule of items below each item description unless such information has already been identified in the item description.

B24A 14-1 FACSIMILE BIDS/PROPOSALS
DSCR (MAR 1999)

(a) Facsimile bids/proposals, amendments (including final proposal revisions (FPRs)), and withdrawals will not be considered unless authorized in the solicitation by either Provision 52.214-31, Facsimile Bids, or 52.215-5, Facsimile Proposals (Sec L). IF NEITHER PROVISION IS IN THE SOLICITATION, FACSIMILE TRANSMITTED DATA AS DESCRIBED ABOVE SHALL BE REJECTED.

(b) In solicitations that do contain either Provision 52.214-31 or 52.215-5, bidders/offerors are notified that for bid/proposal security reasons the FACSIMILE EQUIPMENT AS IDENTIFIED IN THE PROVISION IS NOT LOCATED AT THE PLACE DESIGNATED FOR RECEIPT OF BIDS/OFFERS. REGULAR INTEROFFICE MAIL PICK-UP OF FACSIMILE TRANSMISSIONS OCCURS AT 10:30 A.M. AND 1:30 P.M. DAILY.

(1) Bids, bid amendments, and bid withdrawals received by the facsimile equipment prior to 10:30 a.m. on the day of bid opening will be presumed to have been received on time.

(2) Proposals, amendments to proposals, withdrawals of proposals, and FPRs received by facsimile equipment prior to 1:30 p.m. on the day of closing will be presumed to have been received on time.

B24B 14-2 EVALUATION FOR MULTIPLE AWARDS
DSCR (JAN 1998)

Offers will be evaluated by adding the \$500 administrative cost for each year of the contract period. For example, if a solicitation has four option years, the administrative costs would be \$2,500 (\$500 for the base year plus \$500 for each option year).

B33 17-5 MANDATORY OPTION REQUIREMENT
DSCR (MAR 1999)

The option clause in Section I of this solicitation is MANDATORY. FAILURE TO PROVIDE this pricing information may result in rejection of your offer. If Schedule prices

are requested on both an origin and destination basis and/or on incremental quantities, option prices must be offered in the same manner.

SECTION C

C3 52.211-9G33 POPS - COMPUTER COMPATIBILITY
DSCR (MAR 2001)

(a) In support of the Paperless Ordering Placement System (POPS), the awardee will be required to have a compatible computer system capable of accepting our offers and processing Electronic Data Interchange (EDI) transactions. The American National Standards Institute's (ANSI) X12 Standard will be utilized for formatting the EDI transactions. The EDI system must be available for on line processing not later than 30 days after date of award.

(b) The computer system must also be Year 2000 (Y2K) Compliant. Year 2000 compliant, used with respect to technology, means that the information technology accurately processes date/time data (including, but not limited to, calculating, comparing, and sequencing) from, into, and between the twentieth and twenty-first centuries, and the years 1999 and 2000 and leap year calculations, to the extent that other information technology, used in combination with the information technology being acquired, properly exchanges date/time data with it.

(c) The following ANSI X12 transaction sets are currently sent, received, and processed by the Defense Supply Center Richmond:

850 Purchase/Delivery Order Transaction Set
856 Ship Notice/Manifest Transaction Set

(d) Awardee must be capable of sending, receiving, and processing the above ANSI X12 transaction sets and have an electronic mailbox on a DAASC certified Value Added Network (VAN). For 856 Ship Notice/Manifest Transaction Sets, the awardee will have the option of using the Web-856 application, if it becomes available.

(e) Information regarding EDI, ANSI X12 transactions, and DAASC approved VANs can be obtained from the DAAS web site by going to www.daas.dla.mil, then select SYSTEMS & SERVICES, next select EC/EDI, and lastly select DAASC's VAN LIST.

(f) Specifics of the POPS System can be obtained from:

Defense Supply Center, Richmond
Directorate of Planning and Resource Management
Systems and Procedures Division
ATTN: DSCR-OZP, Sandra Moore
8000 Jefferson Davis Highway
Richmond, VA 23297-5516
(Phone: (804) 279-4552)

(g) The POPS implementation convention can be viewed by going to the DSCR web site at www.dscr.dla.mil/edi/pops/pops.htm. The link for 850 and 856 POPS is: www.dscr.dla.mil/edi2/pops1.htm.

(h) The following vendor EDI/Y2K information applies (vendor fill-in):

SECTION D

D4I 52.211-9G45 POPS-SPECIAL MARKING INSTRUCTIONS
DSCR (OCT 2001)

NOTICE FOR DIRECT VENDOR DELIVERIES: In addition to the requirements of paragraph 5.1.6.2., Markings of ASTM D3951, markings on exterior shipping containers will contain as a minimum the NSN, requisition number, and the contract delivery order number. These markings are to be applied through stenciling or other means, directly to the exterior shipping container or included in the body of the invoice/shipping document which will be permanently affixed to the exterior shipping container. Regardless of method used, all markings must be visible to receiving personnel. When the total number of containers going to the same destination exceeds either 250 pounds (excluding pallet) or a volume of 20 cubic feet, then palletization is required except for 55 gallon drums.

NOTICE FOR SHIPMENT TO DLA STOCK LOCATIONS: Shipments to DLA stock locations must be marked in accordance with MIL-STD-129N dated 15 May 97 and AIM BC 1 with the following exception: Marking, including barcoding, and fragile marking (if required), must be on the outside container and all intermediary containers down to the specified QUP. DSCR Clause 52.211-9G22 (Sec F) applies.

D4K 52.211-9G73 PACKAGING AND MARKING
REQUIREMENTS (JUL 2002) DSCR

(a) Unless stated otherwise, commercial packaging in accordance with ASTM-D-3951 is required for CONUS shipments from the contractor directly to the customer. Commercial packaging and marking is not sufficient for vendor shipments requiring movement through the Defense Transportation System (also referred to as the Military Distribution System or DLA Depot) as the shipment could ultimately be moved via Military Air.

(b) Higher level packaging in accordance with MIL-STD-2073 is mandatory for all shipments that meet the below criteria:

Movement through the Defense Transportation System including shipments to a Military Distribution facility or depot.

OCONUS shipments
FMS shipments
Hazardous material, as cited in the AID or in the Quality Requirements Matrix.

(c) Materials not considered as HAZMAT for CONUS or OCONUS commercial air shipments may be considered HAZMAT for MILAIR shipments OCONUS. As such, contractors/shippers shall ensure that material meeting HAZMAT definitions in DLA 4145.3, Preparing Hazardous Materials for Military Air Shipment, is packaged in accordance with that instruction when the consignee is OCONUS and the shipment will be moved through the Defense Transportation System. DLA 4145.3 is available on the internet at:
www.dscc.dla.mil/downloads/packaging/dlai4145_3.pdf.

(d) All items shall be marked in accordance with MIL-STD-129. Hazardous items and shelf life items, as cited in the AID or in the Quality Requirements Matrix, shall be marked in accordance with MIL-STD-129 and the appropriate clauses cited in the appendix to the matrix and the contract. The contractor is required to package material in accordance with Quantity Unit Pack (QUP), specified in MIL-STD-2073 and the Unit of Issue (UI), specified in each delivery order. A packing slip shall be located in a plastic pouch on the outside of the package. For HAZMAT destined OCONUS, a hard copy of the Material Safety Data Sheet (MSDS) must also be included.

(e) In the event of deployments, this clause may be invoked when shipments originally destined for a CONUS location are diverted to OCONUS destinations thereby necessitating movement of the material through the Defense Transportation System. In such an event, contractors will be notified by the Contracting Officer and an equitable adjustment will be made in the contract price as deemed

D04 52.211-9010 MILITARY SHIPPING LABEL (MSL)
REQUIREMENT - MIL-STD-129P
(FEB 2004)

(a) MIL-STD-129, Revision P, dated December 15, 2002, establishes the requirement for Contractors that ship packaged materiel to the Government to provide both linear and two-dimensional (2-D) bar coding on military shipping labels (MSLs) (but see exceptions in paragraph (d)). The new requirements apply to all shipments, which includes either depot (DLA-Direct) or DVD (Customer-Direct) shipments. Linear (Code 3 of 9 or Code 39) bar codes continue to be required on interior packages (unit and intermediate packages) for the National Stock Number (NSN) and, when applicable, the serial number; and on shipping containers and palletized unit loads for the NSN, Contractor and Government Entity (CAGE) Code, contract number and, when applicable, the serial number. The new requirements do not apply to delivery orders when the basic contract has not been modified to require MIL-STD-129P.

(b) The new MSL replaces former DD Form 1387 and is illustrated in Figures 2a and 2b of MIL-STD-129P. The MSL requires Code 3 of 9 or Code 39 linear bar codes for the Transportation Control Number (TCN), piece number and DoDAAC for the ultimate consignee or mark-for address. The 2-D bar code on the MSL must contain the document (requisition) number, NSN, Routing Identifier Code (RIC), Unit of Issue, Quantity, Condition Code, and Unit Price, which are ordinarily included on the DD Form 250 or the DD Form 1348-1A. MIL-STD-129P provides numerous illustrations of what must be bar-coded and the recommended placement of the bar code. When the contract omits any data element required to be bar-coded, the field should be zero-filled.

(c) MIL-STD-129P, sources for conforming labels, and related information are available on the DLA Packaging Web Site at URL:http://www.dscc.dla.mil/offices/packaging/specstdslist.html#STDs.

(d) This clause does not apply to -

(1) Subsistence items procured through full-line food distributors (prime vendors), 'market ready' type items such as fresh milk, ice cream, and other fresh dairy products, fresh bread and other fresh bakery products, and all fresh fruits and vegetables, shipped within the Continental United States (CONUS) to customers within CONUS;

(2) Any item for which ownership remains with the vendor until the item is placed in designated locations at the customer location prior to issuance to the customer. Government control begins upon placement of the item by the vendor into the designated location or issuance from the designated location by vendor personnel (i.e., the vendor is required to stock bins at the customer location and/or issue parts from a vendor controlled parts room); or

(3) Bulk purchases of petroleum, oil and lubricant products delivered by (1) pipeline; or (2) tank car, tanker and tank trailer for which the container has (i) a capacity greater than 450 L (119 gallons) as a receptacle for a liquid; (ii) a maximum net mass greater than 400 kg (882 pounds) and a capacity greater than 450 L (119 gallons) as a receptacle for a solid; or (iii) a water capacity greater than 454 kg (1000 pounds) as a receptacle for a gas.

NOTES: In bar code element 1 above, the Document Number consists of a 14-character (15 characters when a suffix is included) alphanumeric code. It may be listed on a contract/award as the Requisition Number, Transportation Control Number (TCN), etc.

In bar code element 2 above, the NSN will appear as a 13-digit code without the dashes.

In bar code element 3 above:

The RIC for each procuring activity is as follows:

SECTION E

E3 52.246-2 INSPECTION OF SUPPLIES - FIXED PRICE (AUG 1996)
E5 52.246-11 HIGHER-LEVEL CONTRACT QUALITY REQUIREMENT (FEB 1999)

The Contractor shall comply with the applicable higher-level contract quality requirement cited below, which is hereby incorporated into this contract:

ISO 9001 or ANSI/ASQC Q9001 when Quality Assurance Provision (QAP) 005, 006, 159, 189, 216, 222, V02, or V03 is included.

ISO 9002 or ANSI/ASQC Q9002 for any other QAPs.

DSCR NOTE to 52.246-11:

The higher-level standards referenced above shall apply unless the contractor indicates the proposal is based on a contractor's preferred quality system as identified below:

[] Other recognized industry standard(s) (but non-ISO/ANSI/ASQC) that is equivalent to or better than applicable ISO/ANSI/ASQC standard indicated above.
Specify _____

[] Other process control system that is equivalent to or better than the applicable ISO/ANSI/ASQC standard indicated above which has not previously been determined to be insufficient for the Government's purpose. This may include previously recognized MIL-I-45208 or MIL-Q-9858 systems which have been augmented to be equivalent to ISO 9002 or ISO 9001 respectively.

[] An existing system modeled after
[] MIL-I-45208 or
[] MIL-Q-9858
and not previously determined insufficient for the Government's purpose.
THIS OPTION IS PERMITTED ONLY AS AN INTERIM MEASURE TO ALLOW CONTRACTORS TO TRANSITION TO ISO/ANSI/ASQC STANDARDS.

Third party certification/registration is not required nor will it be considered a substitute for the Government's right to audit/validate a contractor's quality system. ISO 9001 can be accepted for ISO 9002 requirements, however, the reverse does not apply.

MIL-STD-105 has been replaced by ANSI/ASQC Z1.4-1993, Sampling Procedure and Tables for Inspection by Attributes.

MIL-STD-45662A has been replaced by either ISO 10012-1, Quality Assurance Requirements for Measuring Equipment or ANSI/NCSL Z540-1, General Requirements for Calibration Laboratories and Measuring Equipment and Test Equipment.

F1BA 52.211-16 VARIATION IN QUANTITY (APR 1984)

(b) The permissible variation shall be limited to:

0 % (Percent) Increase 0 % (Percent) Decrease

This increase or decrease shall apply to the quantity at the line item level, or for phased delivery at the sub-clin level, as designated by item number followed by two alphas, i.e. 0001AA. The variation (if any) shall be shipped with the quantity for the line item, or for phased delivery the quantity specified for each sub-clin. Under no circumstances will the contractor ship a variation in quantity against any line item/sub-clin other than as specified in the delivery schedule.

DSCR NOTE: Any quantity shipped against the line/sub-clin that exceeds the stated line item/sub-clin quantity plus variation (if any) will be returned and the contractor will be responsible for return shipment costs.

DSCR (APR 2001) I38DC 52.211-9005 CONDITIONS FOR EVALUATION AND ACCEPTANCE OF OFFERS FOR CRITICAL SAFETY ITEMS DLAD (DEC 2001) (a) Definitions. 'Actual manufacturer' means an individual, activity, or organization that performs the physical fabrication processes that produce the deliverable part or other items of supply for the Government. The actual manufacturer must produce the part in-house. The actual manufacturer may or may not be the design control activity. 'Approved source' means a prime contractor or the actual manufacturer(s) cited in the acquisition identification description (AID). It does not include design control activities with no manufacturing capability. 'Critical safety item' (CSI) means a part, assembly, installation, or production system with one or more critical characteristics that, if not conforming to the design data or quality requirements, would result in an unsafe condition that could cause loss of, or serious damage to, the end item or major components, loss of control, or serious injury or death to personnel. 'Design control activity' means a contractor or Government activity having responsibility for the design of a given part, and for the preparation and currency of engineering drawings and other technical data for that part. The design control activity may or may not be the actual manufacturer. 'Exact product' and 'alternate product' are defined in the provision at DLAD 52.217-9002, Conditions for Evaluation and Acceptance of Offers for Part Numbered Items. 'Prime contractor' means a contractor having responsibility for design control and/or delivery of a system/equipment such as aircraft, engines, ships, tanks, vehicles, guns and missiles, ground communications and electronics systems, and test equipment. 'Rebranding' means remarking, re-labeling, repackaging, or otherwise obscuring the marking of the approved source cited in the AID (i.e., the prime contractor or actual manufacturer). (b) The item being acquired is a critical safety item (CSI). Given their vital importance and the catastrophic consequences that can result if they fail, procurement of these items requires the highest standards of oversight and verification. (c) This provision applies only to offers of 'exact product.' Offers of 'alternate product' will be evaluated in accordance with the clause at DLAD 52.217-9002. (d) If the Offeror is the prospective awardee and is not currently an approved source cited in the acquisition identification description (AID) on the schedule page of this solicitation, the Offeror will be requested by the Contracting Officer to provide documented evidence prior to award sufficient to establish that the item being offered is (or will be) the exact item cited in the AID and is (or will be) manufactured by an approved source cited in the AID. Additionally, if the Offeror manufacturers the offered item for an approved source cited in the AID, evidence of approval and acceptance by the approved source will be required. Evidence must include the following at a minimum: | | (1) If offered item(s) are 'not in stock' or 'not yet manufactured' -- (i) A copy of Offeror's Request for Quotation to approved source cited in AID; and (ii) An original, hard copy of quotation received by Offeror from approved source cited in AID; or other verifiable documentation of quotation. (If Offeror is unable to provide this documentation to the Contracting Officer prior to award, it must be provided to the Quality Assurance Representative (QAR) for examination at time of source inspection.) (2) If offered item(s) are 'shipped' or 'in stock' -- (i) A copy of invoice on approved source's letterhead. (Invoice must identify exact item cited in AID and a quantity sufficient to satisfy the solicitation requirement.); or (ii) A copy of packing slip which accompanied shipment from approved source to Offeror. (Packing slip must identify exact item cited in AID and a quantity sufficient to satisfy the solicitation requirement.); and (iii) Inventory control records to establish that items Offeror proposes to furnish under current order are still in Offeror's stock. (This documentation is mandatory and must be provided to Quality Assurance Representative (QAR) for examination at time of source inspection. Documentation may be provided to Contracting Officer prior to award, at Offeror's discretion.) (3) If Offeror is an authorized dealer/distributor, or manufactures the item for an approved source -- (i) An authorized dealer/distributorship agreement, licensee agreement, or other type of agreement. (The agreement must specifically identify the exact item, or otherwise ensure that the Offeror is authorized by the approved source to manufacture or distribute the exact item being acquired. If the agreement covers a general product line or is otherwise not product-specific, the Offeror must also furnish additional documentation to address the exact item being acquired (see above).); or (ii) Letter from an approved source cited in the AID, specifically identifying Offeror as authorized to distribute or manufacture the exact item cited in the AID for that approved source; or (iii) Other verifiable information (e.g., listing of authorized dealers on official Web page of an approved source) to establish the Offeror's authority to manufacture or distribute the exact item cited in the AID for an approved source cited in the AID. (4) When the AID specifies a revision number -- (i) Documentation establishing that the offered item was (or will be) made in accordance with the revision cited in the AID. (This requirement is considered to have been met when documentation provided by Offeror to satisfy other portions of this provision already establishes that offered item was (or will be) made to the revision cited in the AID); or (ii) Documentation identifying the revision offered and the differences between the revision offered and the revision cited in the AID. (e) By the submission of this offer, the Offeror represents that -- (1) The item(s) to be provided to the Government -- (i) Is (or will be) in full compliance with all requirements specified in the solicitation; and (ii) Is not (or will not be) -- (A) A factory second; (B) Changed, mutilated, or rebranded; (C) A manufacturer's overrun; (D) A rejected item; or (E) Government surplus material (unless Offeror has complied with clause at DLAD 52.211-9000, Government Surplus Material). | |

solicitation. Use of multiple awards may increase the active production base to support military requirements with the added benefit of competition throughout the life of the contract.

(b) Evaluation Criteria for Award: Proposals will be evaluated in accordance with the evaluation provision(s) specified in the solicitation. In the event of multiple awards, the same evaluation criteria will be used to determine which proposals represent the best value to the Government. The exact number of awards is left to the discretion of the Contracting Officer considering the administrative burden to the Government to administer multiple awards, the recurring nature of the requirement, the need to increase the active production base for military requirements, and the benefits that may be achieved through continued competition.

(c) Task/Delivery Order Placement Procedure: In the event of multiple awards, each awardee will be provided an opportunity to compete for individual task/delivery orders unless an exception at FAR 16.505(b)(2) applies. However, all testing and approval requirements, such as, but not limited to, first article testing, shall be satisfactorily performed prior to participating in order competition. Requests for order information may be transmitted to awardees by electronic, facsimile or oral means. The Contracting Officer shall establish a common cut-off date for the submission of proposals. As a minimum, evaluation criteria for order placement will include price. The Government reserves the right to consider additional factors such as past performance on earlier orders under the contract, quality, timeliness, cost control, and delivery.

(d) Pricing Individual Task/Delivery Orders-the Price Ceiling Rule: Prices identified in the schedule represent ceiling price(s) for task/delivery order competitions. Therefore, awardees may not submit a price in excess of that specified in the schedule. The Contracting Officer reserves the right to waive the ceiling to accommodate an earlier delivery for urgent requirements provided a delivery was not previously established based on priority.

(e) Conditional Award on Alternate Offer. The Government reserves the right to include amongst the multiple awardees any offeror who has submitted an alternate offer that has not yet been approved, but which has a reasonable likelihood of being approved within 180 days. This award would be a conditional award by which the alternate offeror would only be eligible to compete for orders in the event that the alternate offer is approved. The purpose of this conditional award is so that award to known acceptable sources to the Government is not delayed pending review of the alternate offer. In the event that the alternate offer is subsequently approved, and any required first article test is successfully completed and approved, that offeror will be eligible to compete for all subsequent task/delivery orders after all other multiple awardees are notified of the approval of the alternate offer. In the event that the alternate offer is rejected, the conditional award will be subject to a no fault cancellation. For approved items, the Government reserves the right to impose first article test if recommended by the Engineering Support Activity. In such cases, the modification removing the conditional award will also add the first article requirement. From the time the modification is issued, the contractor is legally bound to perform on those delivery orders issued to their company and shall comply with all terms and conditions of the contract to include the default clause.

(f) Task and Delivery Order Ombudsman: In accordance with FAR 16.505(b)(5), delivery order placement concerns will be considered by the DSCR Task and Delivery Order Ombudsman. Such complaints should be addressed to:

FLEXIBLE OPTIONS DSCR (JAN 2000)

(a) This solicitation is for an indefinite quantity with a guaranteed minimum for the base year. It also includes 2 options for one year each.

(c) To exercise this right, the Government will provide written notice of its intent to exercise the option any time after having ordered ~~NA~~ % of the stated maximum or within thirty days of the effective date of any delivery order that reaches the stated maximum quantity.

I192F 52.217-9G20 ADDITION/DELETION OF ITEMS ON CONTRACT DSCR (DEC 2000)

(a) The Government retains the right to unilaterally delete from the contract, at each option renewal period, any items which were awarded on a sole source basis, in the event that an alternate product is available from another source.

(b) The Government reserves the right to bilaterally add to the contract new or replacement items, by modification, at prices to be negotiated. All new requirements are subject to full and open competition for the period of time remaining on the contract prior to addition to the contract.

(c) If any item in this contract becomes obsolete or is discontinued as a commercial catalog item, the contractor will provide the Government thirty (30) days advance written notice of such obsolescence, or cancellation and agrees to honor delivery orders for the item issued under this contract during such thirty (30) day period. The Government will delete any such item from this contract after receiving the required notice. If the contractor considers another commercial catalog item as a suitable substitute or replacement for the discontinued item, it will so advise the Government at the time it advises of the discontinued item. If the Government elects to include the replacement item in the contract, the contract will be modified accordingly.

(d) If the contractor discontinues an item without

| <p>192K 52.217-9G25 SURGE & SUSTAINMENT REQUIREMENT DSCR (JUN 2001)</p> | | <p>(d) Options to Extend the Contract Term: The Government may consider the contractor's performance of the S&S requirements in determining whether exercise of the option is the most advantageous method of meeting the Government's needs. Factors that may be considered include maintenance of the S&S capability; results of validation/testing; performance during an actual contingency; and other pertinent information related to the S&S requirement.</p> | |
| <p>(a) Definitions. As used in this clause-</p> <p>(1) 'Surge and Sustainment (S&S) Capability' means the ability of the contractor and base suppliers to meet increased quantity/accelerated delivery requirements, using production and supplier base capabilities, in support of a broad spectrum of possible Department of Defense contingencies. This capability includes both the ability to ramp-up to meet early requirements (i.e., surge), as well as to sustain an increased production and delivery pace throughout the contingency(ies) (i.e., sustainment). The spectrum of possible contingencies includes major theatre warfare and smaller-scale contingency operations.</p> <p>(2) 'Surge and Sustainment (S&S) Quantity' means the quantity beyond peacetime level requirements necessary to support contingency operations. The quantity and required delivery are identified on an NSN basis, representing that needed to support two separate contingency operations for a specified time period, generally a year unless otherwise specified in the schedule.</p> <p>(b) Scope of Requirement. The Contractor agrees to maintain the capability to produce and deliver the quantity of supplies or services identified in the schedule as the S&S requirement throughout the life of the contract. This capability shall be maintained in addition to peacetime level requirements and other existing Government contracts.</p> <p>(1) Notification of S&S Capability Changes. Changes that negatively impact S&S capability shall be reported in writing to the Contracting Officer within ten working days after the contractor becomes aware of such impact. Such notification shall include the Contractor's proposed corrective action plan.</p> <p>(2) Changes and Additions. The Government reserves the right to revise, reassess, or update S&S requirements during the life of the contract.</p> <p>(3) Agreement to Participate in S&S Validation/Testing. By submission of an offer for the S&S requirement, the contractor agrees to participate in S&S testing as required by the Government to validate the S&S capability. Testing/validation may include, but not be limited to, participation in live exercises, participation in Commander-in-Chiefs or Joint Chiefs of Staff exercises approved in the DLA Joint Training Plan, paper exercises, simulations, or command post exercises. The Government reserves the right to require tests using other methodologies when deemed appropriate.</p> <p>(c) Ordering. Any S&S designated supplies or services to be furnished under this contract will be ordered in accordance with the ordering clause by issuance of delivery orders or task orders specifically identified as 'S&S Orders.'</p> <p>(1) Effective Date for S&S Capability. Orders for the S&S quantity may be issued immediately after award unless the contractor has identified during negotiations, and the Government has approved, an alternate date for the contractor to attain the required S&S capability. The contractor's capability assessment shall clearly support the alternate date for attaining full S&S capability.</p> <p>(2) Limitations. The order limitations clause applicable to the peacetime level requirements shall not apply to the S&S quantity to the extent that it conflicts with the quantity necessary to support a contingency. The Government reserves the right to order less than the total phased quantity specified for each S&S delivery. The Government may order in excess of each phased delivery quantity provided the contractor shall accept the excess quantity. Multiple orders for the same NSN may be issued to support multiple contingencies provided the total quantity ordered does not exceed the total S&S quantity for all phases of delivery.</p> <p>(3) Contract Ceiling. The term does not include separate or single-user rest rooms and necessary dressing or sleeping areas, provided to assure privacy between the sexes.</p> <p>(b) The Contractor agrees that it does not and will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not and will not permit its employees to perform their services at any location under its control where segregated facilities are maintained. K2 52.203-2 CERTIFICATE OF INDEPENDENT PRICE
DETERMINATION (APR 1985)

(a) The offeror certifies that:

(1) The prices in this offer have been arrived at
independently, without, for the purpose of restricting
competition, any consultation, communication, or agreement
with any other offeror or competitor relating to (i) those
prices, (ii) the intention to submit an offer, or (iii) the
methods or factors used to calculate prices offered.

(2) The prices in this offer have not been and will
not be knowingly disclosed by the offeror, directly or
indirectly, to any other offeror or competitor before bid
opening (in case of a sealed bid solicitation) or contract
award (in the case of a negotiated solicitation) unless
otherwise required by law; and

(3) No attempt has been made or will be made by the
offeror to induce any other concern to submit or not to submit
an offer for the purpose of restricting competition.

(b) Each signature on the offer is considered to be a
certification by signatory that the signatory --

(1) Is the person in the offeror's organization
responsible for determining the prices being offered in this
bid or proposal, and that the signatory has not participated
and will not participate in any action contrary to
Subparagraphs (a) (1) through (a) (3) above; or

(2) (i) has been authorized, in writing, to act as
agent for the following principals in certifying that those
principals have not participated, and will not participate in
any action contrary to Subparagraphs (a) (1) through (a) (3)
above . . .

(Insert below the full name of person(s) in the offeror's
organization responsible for determining the prices offered in
this bid or proposal, and the title of his or her position in
the offeror's organization);

NAME: _____

(ii) As an authorized agent, does certify that
the principals named in Subdivision (b) (2) (i) above have not
participated, and will not participate, in any action contrary
to Subparagraphs (a) (1) through (a) (3) above; and

(iii) As an agent, has not personally
participated, and will not participate in any action contrary
to Subparagraphs (a) (1) through (a) (3) above.

(c) If the offer deletes or modifies Subparagraph (b) (2)
above, the offeror must furnish with its offer a signed
statement setting forth in detail the circumstances of the
disclosure.

K4A 52.203-11 CERTIFICATION AND DISCLOSURE
REGARDING PAYMENTS TO INFLUENCE
CERTAIN FEDERAL TRANSACTIONS
(APR 1991)

(a) The definitions and prohibitions contained in the
clause, at FAR 52.203-12, Limitation on Payments to Influence
Certain Federal Transactions, included in this solicitation,
are hereby incorporated by reference in paragraph (b) of this
certification.

(b) The offeror, by signing its offer, hereby certifies
to the best of his or her knowledge and belief that on or
after December 23, 1989, --

(1) No Federal appropriated funds have been paid or
will be paid to any person for influencing or attempting to
influence an officer or employee of any agency, a Member of
Congress, an officer or employee of Congress, or an employee
of a Member of Congress on his or her behalf in connection
with the awarding of any Federal contract, the making of any
Federal Grant, the making of any Federal loan, the entering
into of any cooperative agreement, and the extension,
continuation, renewal, amendment or modification of any
Federal contract, grant, loan, or cooperative agreement;

(2) If any funds other than Federal appropriated
funds (including profit or fee received under a covered
Federal transaction) have been paid, or will be paid, to any
person for influencing or attempting to influence an officer
or employee of any agency, a Member of Congress, an officer
or employee of Congress, or an employee of a Member of
Congress on his or her behalf in connection with this
solicitation, the offeror shall complete and submit, with its
offer, OMB standard form LLL, Disclosure of Lobbying
Activities, to the Contracting Officer; and

(3) He or she will include the language of this
certification in all subcontract awards at any tier and
require that all recipients of subcontract awards in excess
of \$100,000 shall certify and disclose accordingly.

(c) Submission of this certification and disclosure is a
prerequisite for making or entering into this contract
imposed by section 1352, title 31, United States Code. Any
person who makes an expenditure prohibited under this
provision or who fails to file or amend the disclosure form
to be filed or amended by this provision, shall be subject to
a civil penalty of not less than \$10,000, and not more than
\$100,000, for each such failure.

L3 52.204-9G01 ELECTRONIC ORDER TRANSMISSION
INDEFINITE DELIVERY CONTRACT
DSCR (MAR 2001)

(a) Offerors are advised that electronic order transmission is available for use via the Paperless Order Placement System (POPS) application. If the successful offeror chooses to use Electronic Data Interchange (EDI), they will be required to have a compatible computer system capable of accepting our offers and processing EDI transactions. The American National Standards Institute's (ANSI) X12 Standard will be utilized for formatting the EDI transactions. The EDI system must be available for on line processing not later than 30 days after award.

(b) The computer system must also be Year 2000 (Y2K) Compliant. Year 2000 compliant, used with respect to

technology, means that the information technology accurately processes date/time data (including, but not limited to, calculating, comparing, and sequencing) from, into, and between the twentieth and twenty-first centuries, and the years 1999 and 2000 and leap year calculations, to the extent that other information technology, used in combination with the information technology being acquired, properly exchanges date/time data with it.

(c) The following ANSI X12 transaction sets are currently sent, received, and processed by the Defense Supply Center Richmond:

850 Purchase/Delivery Order Transaction Set
856 Ship Notice/Manifest Transaction Set

(d) Offerors must be capable of sending, receiving, and processing the above ANSI X12 transaction sets and have an electronic mailbox on a DAASC certified Value Added Network (VAN). For 856 Ship Notice/Manifest Transaction Sets the awardee will have the option of using the Web-856 application, if it becomes available.

(e) Information regarding EDI, ANSI X12 transactions, and DAASC approved VANs can be obtained from the DAAS web site by going to www.daas.dla.mil, then select SYSTEMS & SERVICES, next select EC/EDI, and lastly select DAASC's VAN LIST.

(f) Specifics of the POPS System can be obtained from:

DOCUMENTATION REQUIREMENTS
DSCR (SEP 2002)

(a) If an item other than that cited in the
Procurement Identification Description (PID) is offered
under provision 52.217-9002, (Sec L), of this solicitation,
this provision specifies the Government's requirements for
additional documentation needed to evaluate whether the
offered item meets the requirements for the Critical
Application Item (CAI) and/or Flight Safety Critical
Application Part (FSCAP) identified in the PID. The
guidance herein is also intended to assist offerors in
determining what documentation is needed to insure an
adequate and timely evaluation of the source manufacturing
the item - namely, a source approval request (SAR). The
offeror shall determine which category applies. The
specified documentation for that category, as well as that
specified for all categories at subparagraph (b), shall be
submitted in support of the manufacturing process.

(1) CATEGORY I - Manufacturer of the same item
for the Original Equipment Manufacturer (OEM) or for the
Department of Defense (DoD).

(2) CATEGORY II - Manufacturer of a similar item

for the OEM or DoD. (A similar item is defined as an item whose design, application, operating parameters, material, and manufacturing processes are similar to those of the item for which source approval is sought.)

(3) CATEGORY III - New manufacturer. The exact or similar item has not been previously provided to the OEM or DoD

(b) Requirements for all CATEGORIES in addition to the below checklist.

(1) Documentation shall be provided stating if the company seeking approval is a nonmanufacturing source or the actual manufacturer. If the company seeking approval is a nonmanufacturing source, the required information shall also be submitted on the manufacturer.

(2) Any SAR identified to Boeing Rights Guard must comply with the Boeing Rights Guard Agreement.

(c) The offeror shall check below the CATEGORY that applies and include this part of the provision, as well as the additional required documentation, in support of the source approval request.

CATEGORY I (same part) []
CATEGORY II (similar/equivalent part) []

L59DA 52.217-9G26 SURGE & SUSTAINMENT CAPABILITY ASSESSMENT DSCR (JUNE 2001)

(a) Proposals submitted in response to this solicitation shall include a proposed approach to meeting the Surge & Sustainment (S&S) requirement identified in the schedule. The proposed approach shall include the initial ramp up (surge) and subsequent production and delivery (sustainment) of supplies to support simultaneous contingencies. The contractor's proposed approach shall be supported by a production capability assessment, as an attachment to the proposal, containing, but not limited to, the following areas:

(1) The contractor's methodology enabling visibility of supplier base resources on a continuing basis.

(2) Identify supplier base inventories, production capability, on-demand manufacturing and advanced technology capabilities, or any other means of support available to meet S&S requirements and, based on this identification, a description of S&S strategies for all items.

(3) Identify 'problem' items for which S&S cannot be easily met, proposed solutions for these items, and any significant investments (dollars or otherwise) needed to implement these solutions, including investments by the Government.

(4) Describe access to, and plans for, coordinating distribution and transportation services for meeting S&S requirements.

(5) The contractor's agreements with suppliers and service providers that reflect access to S&S resources.

(6) Clearly identify any significant investments (dollars or otherwise) required to resolve the problem areas identified under subparagraph (3), or other subparagraphs above, needed to develop S&S capability, including, but not limited to, the following information:

- (i) Why the investment is needed;
- (ii) what will be purchased with the investment;
- (iii) basis for the investment cost;
- (iv) the S&S capability to be gained from the investment; and,
- (v) for investments needed to affect strategies, an analysis of what strategies were considered and why the proposed strategies are the most cost effective.

(7) If the S&S requirements can be easily met with current levels of production, the following information may

be provided in lieu of the detailed assessment requested above:

- (i) The contractor's rationale for concluding the required S&S resources are readily available; and,
- (ii) the contractor's ability to meet the S&S requirements through access to these resources.
(Note: The commercial nature of an item, in and of itself, is not an adequate rationale for concluding the item is readily available. The information submitted shall include a description of access to, and plans for, coordinating distribution and transportation services for meeting S&S requirements.)

L75B 52.233-9000 AGENCY PROTESTS DLAD (SEP 1999)

Companies protesting this procurement may file a protest

- 1. with the contracting officer,
- 2. with the General Accounting Office, or
- 3. pursuant to Executive Order No. 12979, with the Agency for a decision by the Activity's Chief of the Contracting Office.

Protests filed with the agency should clearly state that they are an 'Agency Level Protests filed under Executive Order No. 12979.' (Note: DLA procedures for Agency Level Protests filed under Executive Order No. 12979 allow for a higher level decision on the initial protest than would occur with a protest to the contracting officer; this process is not an appellate review of a contracting officer's decision on a protest previously filed with the contracting officer). Absent a clear indication of the intent to file an agency level protest, protests will be presumed to be protests to the contracting officer.

DSCR NOTE:

Executive Order 12979 encourages the use of Alternative Dispute Resolution in resolving Agency-level protests. Therefore, DSCR has in place a process to mediate Agency-level protests filed pursuant to Executive Order 12979. Mediation is a voluntary process where the parties meet with a third party neutral (the mediator) to discuss their positions and open a dialogue. The mediator does not make any decisions on the dispute, but rather helps the parties explore their concerns and possible avenues for solutions. Any mediation will occur at DSCR. A trained DSCR mediator who has not had previous personal involvement in the procurement will conduct the mediation. If resolution of the protest is not reached through the mediation process, the protest will be forwarded to the Chief of the Contracting Office for a written decision on the record. If an offeror wishes to file an Agency-level protest, but does not wish to engage in a mediation, the Agency-level

protest should state that the protesting party does not wish to participate in a mediation and would like a decision on the written record.

L75BC 52.233-9001 DISPUTES: AGREEMENT TO USE
ALTERNATIVE DISPUTE RESOLUTION
DLAD (JUN 2001)

(a) The parties agree to negotiate with each other to try to resolve any disputes that may arise. If unassisted negotiations are unsuccessful, the parties will use alternative dispute resolution (ADR) techniques to try to resolve the dispute. Litigation will only be considered as a last resort when ADR is unsuccessful or has been documented by the party rejecting ADR to be inappropriate for resolving the dispute.

(b) Before either party determines ADR inappropriate, that party must discuss the use of ADR with the other party. The documentation rejecting ADR must be signed by an official authorized to bind the contractor (see FAR 52.233-1), or, for the Agency, by the contracting officer, and approved at a level above the contracting officer after consultation with the ADR Specialist and with legal counsel (see DLA Directive 5145.1). Contractor personnel are also encouraged to include the ADR Specialist in their discussions with the contracting officer before determining ADR to be inappropriate.

(c) If you wish to opt out of this clause, check here (). Alternate wording may be negotiated with the contracting officer.

L82 52.252-1 SOLICITATION PROVISIONS
INCORPORATED BY REFERENCE
(FEB 1998)

This solicitation incorporates one or more solicitation provisions by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. The offeror is cautioned that the listed provisions may include blocks that must be completed by the offeror and submitted with its quotation or offer. In lieu of submitting the full text of those provisions, the offeror may identify the provision by paragraph identifier and provide the appropriate information with its quotation or offer. Also, the full text of a solicitation provision may be accessed electronically at this/these address(es):

SECTION M

M5 52.213-9001 EVALUATION FACTOR FOR SOURCE
INSPECTION DLAD (MAY 1999)

M8 52.214-9002 TRADE DISCOUNTS DLAD (JUN 1983)

M10F 52.215-9G05 AUTOMATED BEST VALUE SYSTEM
DSCR (JUL 2002)

(a) The Automated Best Value System (ABVS) Score as an Element of Past Performance Evaluation.

(1) ABVS scores do not determine eligibility for award or technical acceptability. The Government shall use ABVS scores to compare past performance among offerors, not to make determinations of responsibility.

(2) To evaluate each offeror's past performance, DLA will assign an ABVS score to each offeror based on the offeror's past performance. ABVS scores for performance in each Federal Supply Class (FSC score) will be based on DLA consolidated performance history. An offeror may have multiple FSC scores but will have only one DLA score, which is a compilation of the offeror's FSC scores for all business conducted with DLA. These scores will be calculated monthly and remain in effect for a month. The ABVS score is a combination of an offeror's delivery and quality scores. The quality score reflects validated contractor caused product and packaging nonconformances during the rating period. For administrative purposes, the rating period excludes the most recent 30 days. The delivery score reflects all lines shown as delinquent during the rating period. For administrative purposes, the rating period excludes the most recent 60 days. For ABVS purposes, delinquent lines represent shipments not shipped and/or received in their entirety by the contract delivery date. The 30 and 60 day offset periods are NOT grace periods.

(3) Business Systems Modernization.

(i) The Defense Logistics Agency is developing and installing a new suite of commercial business software we call Business Systems Modernization (BSM). BSM will replace the old material management systems with the best of today's business applications. The first phase of BSM that will affect both DLA and our business partners is called the Concept Demonstration. This Concept Demonstration will use actual BSM software, real time data and actual transactions such as solicitations and awards. But because of the new software being tested, certain processes will change during the test and one of the most important is the change in ABVS. The collection of past performance information for certain NSNs in ABVS has been changed by the new software and will be affected by this Concept Demonstration beginning in August 2002.

(ii) Beginning in August 2002, ABVS will not collect performance information on NSNs that are included in this BSM test. The performance data for quality and delivery performance from new contract awards for these NSNs will not be used in the calculation of FSC scores. The contract line items will also not be included in the total number of contract line items on which the FSC score is based. Subsequently, the DLA score, which is a compilation of the FSC scores, will not include performance data from new awards on these NSNs. For NSNs, which are not in the BSM test, ABVS will continue to work as it does today.

(iii) In order to determine if a NSN or FSC is included in this BSM test, go to the BSM Supplier Information Resource Center, <http://www.dla.mil/j-6/bsm/SIRC/SIRC.htm>. Awards not included in the ABVS performance data will be identified by contract numbers beginning with SPMXXX or SPEXXX in lieu of SP0XXX (this does not apply to orders issued against non-DLA Basic Ordering Agreements or contracts).

(iv) This change also means that your ABVS

score in BSM will be your DLA score only; the FSC score will not be visible. This initial release will provide an opportunity for DLA, our customers, and our suppliers to use the new technology and processes to improve our supply chain effectiveness. Further information is found at the BSM Vendor Information Center at <http://131.70.202.70/j%2D6/bsm/test/vic.htm>.

(4) DSCR will make negative quality and delivery data reflected in the ABVS score available to offerors by the 15th day of the month via the ABVS Website. The offeror's negative performance data will be posted before it is reflected in the ABVS score (Preview Period), to give offerors an opportunity to review and verify data. An offeror must challenge any negative data within the Preview Period to assure corrections are posted before calculation of the score. Offerors must submit challenges and substantiating evidence (e.g. invoices, DD Form 250s, modifications) to the ABVS Administrator. The 'Center' field will identify the appropriate focal point. For those identified as 'DSCR,' send challenges to:

Defense Supply Center Richmond
Attn: DSCR-OZP (ABVS)
8000 Jefferson-Davis Highway
Richmond, VA 23297-5516

Telephone (804) 279-6881
FAX (804) 279-5042

(5) Though offerors may challenge negative data at any time, it is to the offeror's advantage to challenge negative data during the Preview Period before it has an opportunity to be reflected in the ABVS score. Accordingly, an offeror should review performance data on a monthly basis at a minimum. When a challenge is received, the ABVS score will be flagged. The flag will remain until the challenge is resolved. If an offer under evaluation involves a challenged score, then the Contracting Officer will consider the nature of the challenged data and its relevance to the acquisition as part of the award decision. The ABVS Administrator will adjust the ABVS score if the Administrator upholds an offeror's challenge. Scores created in the update cycle immediately following the determination will reflect the adjustment.

(6) When there is a discrepancy between the offeror's challenged data and the Government's data, it becomes disputed data. The Government will make every effort to resolve the discrepancy expeditiously. However, the Government is the final authority for resolution of disputed data and its use in the source selection process, and may make an award decision despite the existence of an unresolved challenge.

(b) Using the ABVS score for evaluation.

(1) The contracting officer will first evaluate offers using the FSC score for the solicited FSC in effect at the time offers are evaluated. The contracting officer will use an offeror's DLA score to evaluate an offeror without an FSC score for that particular FSC. The contracting officer may consider the volume of business on which the FSC score is based as a measure of confidence in the score's indication of performance risk. The contracting officer may choose to use the DLA score if he or she lacks confidence in the FSC score. The contracting officer also may use the DLA score if the FSC scores among offerors are relatively equal. An offeror with no performance history will not be evaluated favorably or unfavorably and will be assigned a '999.9' in the ABVS. A '999.9' is used to designate those instances wherein the offeror has no past performance history, has no history for the particular FSC or has no history for the timeframe being rated.

(2) Contractor caused discrepancies or delinquencies will be reflected in the ABVS as an indicator of past performance. Repair, replacement or reimbursement of quality and packaging defects will not provide relief of negative ABVS data. Contractor caused delivery extensions, regardless of consideration paid, will be reflected in the delivery score.

M10G 52.215-9G06 EVALUATION AND AWARD
DSCR (FEB 2000)

(a) AWARD. The Government intends to evaluate proposals and, if necessary, conduct discussions with all responsible offerors within the competitive range. The award will be made to the offeror whose proposal conforms

to the terms and conditions of the solicitation and represents the best value to the Government. Therefore, award may be made to other than the lowest priced or the highest technically rated offer.

(b) RELATIVE IMPORTANCE AND TRADE-OFFS. The Government will base the determination of best value on a comparative assessment of the offerors' prices, past performance, and the other evaluation factors identified elsewhere in this solicitation. The determination of best value also considers the relative importance of the evaluation factors. All evaluation factors, when combined, are:

- ☐ significantly more important than cost or price. As other evaluation factors become more equal, the evaluated cost or price becomes more important.
- ☒ approximately equal to cost or price; or
- ☐ significantly less important than cost or price. As the evaluated cost/price becomes more equal, relative importance of all other evaluation factors becomes more significant.

The final award decision may involve a trade-off among cost or price and the non-price factors. Factors that may be considered in the trade-off process include, but are not limited to:

Item criticality and weapons system application
Delivery schedule and current inventory status
Historical delivery or quality problems
Concerns over limited supply sources and industrial base
Benefits from obtaining new sources

(c) COST OR PRICE. The Government will evaluate the offered cost or price for cost realism, as defined in FAR 15.401, and reasonableness. The Government will add any other cost or price evaluation factors identified elsewhere in this solicitation (e.g. Buy American Act or FOB Origin transportation costs) to arrive at the offeror's evaluated cost or price. The evaluated cost or price will be used in conjunction with the other non-price factors to determine the best value to the Government.

(d) PAST PERFORMANCE EVALUATION FACTORS. The Government will use the past performance evaluation factors marked below in addition to cost or price and other evaluation factors specified in the solicitation. Unless indicated otherwise, past performance is significantly more important than other non-price factors. Within the past performance subfactors, ABVS scores will be weighed most heavily because of their relevance to DSCR awards. Quality history and delivery schedule compliance will be weighed more heavily than the remaining past performance subfactors. All other non-price evaluation factors specified in this solicitation weigh equally, unless otherwise indicated.

- ☒ ABVS Score (52.215-9G05)
- ☐ Quality History
- ☐ Delivery Schedule Compliance
- ☐ Javits-Wagner-O'Day (JWOD) (52.215-9005)
- ☐ Mentoring Business Agreements (MBA) (52.219-9003)
- ☐ Socioeconomic Support (52.215-9003)
- ☐ Other (specify):

(e) PAST PERFORMANCE. Past performance includes, but is not limited to, the offeror's record of conforming to contract requirements and standards of good workmanship; adherence to contract schedules, including the administrative aspects of performance; the offeror's reputation for reasonable and cooperative behavior and commitment to customer satisfaction; and generally, the offeror's business-like concern for the customer's interest.

(i) Offerors may submit with their offer information on past and current Federal (non-DSCR), State

and local government and private sector contracts performed by the offeror at the proposed performance location within the last three years that are similar in nature to this acquisition. Offerors electing to submit this data must furnish at least the following information: name and address of the contracting entity; the contract number; award and completion dates; the dollar value; the contract type; the items or services provided; two references, with title and phone number; and any problems encountered and the corrective action taken by the offeror.

(ii) By submitting past performance information, the offeror agrees to permit the Government's representatives to contact the listed references and inquire of the offeror's performance. If more than three contracts are identified, the Government reserves the right to randomly select and limit its review to three contracts. In addition to the information provided, the Government may consider information obtained from other sources when evaluating the offeror's past performance. Offerors will be given the opportunity to discuss negative past performance information obtained from references if the offeror has not had a previous opportunity to comment on that information.

(iii) In addition to the information above, DSCR will use the Automated Best Value System (ABVS) to evaluate quality and past performance on DLA awards (see 52.215-9G05).

(iv) Offerors with no past performance history (whether internal or external to the Federal government) will not be evaluated favorably or unfavorably.

M12 52.216-9G09 EVALUATION - INDEFINITE QUANTITY CONTRACT DSCR (NOV 1996)

Offers will be evaluated on the basis of the estimated annual quantity. If quantity breaks are offered with various prices, the highest price offered will be used for evaluation.

If line items for both stock and DVD are included in the schedule offers will be evaluated based on the total extended price for the stock and DVD line items.

M15 52.217-5 EVALUATION OF OPTIONS (JUL 1990)

M18 52.217-9G11 EVALUATION OF OPTION TO EXTEND THE TERM OF THE CONTRACT - SUPPLIES DSCR (JAN 1996)

The evaluation of options to extend the term of the contract as required by either FAR Clause 52.217-5 (Section M) or 52.212-2 will be based on the highest possible option price offered for each option as specified in DSCR Clause 52.217-9G08 (Section I).

M19CA 52.217-9G27 SURGE & SUSTAINMENT EVALUATION - MINIMUM REQUIREMENT DSCR (JUNE 2001)

(a) Evaluation. The surge & sustainment (S&S) requirement identified in the schedule represents a minimum requirement for award; therefore, offerors that fail to offer for the S&S requirement or submit proposals that are deficient may be rejected. The S&S capability assessment specified in 52.217-9G26 will be evaluated to determine the offeror's ability to meet the increased quantity/accelerated delivery requirements identified in the schedule for S&S.

(b) Acceptable Standard. Acceptable proposals must:

(1) describe a methodology which enables visibility of supplier base resources on a continuing basis;

(2) identify supplier base inventories, production capability, on-demand manufacturing and advanced technology capabilities, or any other means of support available to meet S&S requirements and, based on this identification, provide a description of S&S strategies for all items;

(3) identify problem items for which S&S cannot be easily met, propose solutions for these items, and identify any significant investments (dollars or otherwise) needed to implement these solutions;

(4) describe access to, and plans for,

coordinating distribution and transportation services for meeting S&S requirements; and

(5) provide information regarding agreements with subcontractors, suppliers and service providers, if applicable, that reflect access to S&S resources;

(6) identify any significant investment (dollars or otherwise) under (3) or other subparagraphs above, needed to develop S&S capability, with the following information:

(i) An explanation of why the investment is needed.

(ii) A description of what items or materials will need to be purchased with the investment.

(iii) Provide a justification/basis for the investment cost.

(iv) Identify the S&S capability to be gained from the investment.

(v) For investments to effect S&S strategies, an analysis of what strategies were considered and why the proposed strategies are the most cost effective.

(c) Acceptable Standard Commercial. The following standard shall apply in lieu of paragraph (b) for commercial items that are readily available and accessible in sufficient quantities to meet the S&S requirements. Adequate proposals shall:

(1) provide information to support the rationale for concluding that the S&S items are readily available;

(2) describe how access to these resources will provide the ability to meet S&S requirements; and

(3) identify a plan for coordinating distribution and transportation services for meeting S&S requirements

(d) Deficient Proposals. Proposal revisions to correct deficiencies in S&S capability may be addressed during negotiations with offerors determined within the competitive range.

(e) Price. Price(s) associated with S&S items will be evaluated for reasonableness and realism in accordance with proposal analysis techniques specified in FAR 15.404. The total evaluated price associated with a proposal will include S&S prices/costs only to the extent such prices/costs represent:

(1) the dollar amount that must be obligated or reserved at time of award to implement and or maintain the S&S capability and

(2) the dollar amount associated with a confirmed requirement to support an actual contingency.

(f) Materially Unbalanced Offers. The Government may determine that a proposal is unacceptable if the prices proposed are materially unbalanced between line items or subline items. Unbalanced pricing exists when, despite an acceptable total evaluated price, the price of one or more contract lines is significantly overstated or understated as indicated by application of cost or price analysis techniques. A proposal may be rejected if the Contracting Officer determines that lack of balance poses an unacceptable risk to the Government.

M33 52.247-9G21 BASIS FOR SUBMISSION AND EVALUATION OF OFFERS DSCR (JAN 1996)

(a) Offers are invited on an f.o.b. destination basis for items ALL , . Bids submitted on any other basis will be rejected as non-responsive.

(b) Offers are invited on the basis of both f.o.b. origin and destination for items NA , .

(c) Offers are invited on an f.o.b. origin basis for items NA . When supplies are regionally priced the applicable regions shall be specified below. If regional price(s) are offered and the region is not specified, the bid will not be considered.

 QUALITY CONTROL CODES (QCC)***

1ST Position (Contract Quality Requirements)

- | | |
|---|---------------------------------|
| 1 - Contractor Responsibility | (FAR 46.202-1/46.301/52.246-1) |
| 2 - Standard Inspection | (FAR 46.202-2/46.302/52.246-2) |
| 3 – Higher Level Contract Quality (Tailored ISO 9002) | (FAR 46.202-3/46.311/52.246-11) |
| 4 - Higher Level Contract Quality ISO 9002 | (FAR 46.202-3/46.311/52.246-11) |
| 5 - Higher Level Contract Quality ISO 9001 | (FAR 46.202-3/46.311/52.246-11) |

2nd Position (Quality Subsystem Identification)

0 - No Quality Subsystem requirements

1 - First Article Testing (FAT) - Contractor FAT-C

FAT and approval consists of the Contractor testing and/or examining items prior to regular production on a contract followed by the preparation/evaluation of attendant test reports.

2 - First Article Testing - Government FAT-G

FAT and approval consists of the Governments testing and/or examination of the items submitted by a contractor prior to regular production on the contract followed by the preparation/evaluation of attendant test reports.

3 - Traceability Documentation Required (H-3) –DSCC 52.246-9C27

Contractor shall furnish a Certification of traceability initiated by the manufacture.

4 - Measuring and Test Equipment - DLAD 52.246-9003 (M/TE)

The M/TE clause requires the Contractor to ensure that the gauges and other testing

equipment used in determining whether the supplies presented to the government for acceptance under this contract fully conform to specified technical requirements and are calibrated in accordance with the applicable paragraphs of ANSI/NCSL-Z450-1. The Defense Logistics Acquisition Regulation (DLAR) 4105.1 paragraph 46.391 requires the contracting officer to use both the COQC and standard inspection clauses with this clause

5 - Product Verification Testing - DLAD 52.246-9004 (PVT)

The PVT clause assures the Government has a right to inspect and perform chemical and/or mechanical/dimensional conformance tests as the Government deems necessary. The inspection clause of FAR 52.246-2 and ANSI/ASQC Z1.4-1993, Sampling Procedure and Tables for Inspection by Attributes. The DLAR 4105.1 paragraph 46.392 requires the COQC clause and inspection at source when using this clause.

6 - Certificate Of Quality Compliance - DLAD 52.246-9000 (CoQC)

The Contractor shall prepare and furnish a Certificate of Quality Compliance (COQC) for all supplies delivered under this contract. This clause maybe used with either source or destination inspection.

7 - Deliverable Data - 1423

The Contractor is required to deliver technical data as indicated on DD Form 1423. DD Form 1423 is required and will be included in the solicitation and award documents.

8 - Two or More Codes Apply

The multiple quality subsystem requirements are listed in the Contract Technical Data File (CTDF), Option N, in-the-clear test field.

3rd Position (Quality Specific Requirements)

0 - No Specific Requirements

1 - Calibration Systems Requirements

The Contractor is required to have a calibration system that complies with their industry standard. Note: Not applicable with Higher Level Inspection.

2 - Quality Assurance Letter of Instruction (QALI)

QA personnel have determined that a QALI should be written to the responsible Government Inspection Activity when this NSN is awarded.

3 - Preaward Survey

There is sufficient NSN Quality History that suggests that Contracting should have a Preaward Survey prior to the next award of this NSN.

4 - Postaward Conference

There is sufficient NSN/Contractor quality history that suggests the QAS should request the PCO, or have the QAR request the ACO, to schedule a Postaward Conference for the next award.

5 - Individual Repair Parts Ordering Data (IRPOD)

This NSN requires IRPOD data, i.e., instructions from the U.S. Navy Ships Parts Control Center (SPCC) for Nuclear Reactor Plant application.

6 - Shelf Life (DSS)

QA Personnel have reviewed the shelf life coding for appropriate Depot Storage Standard (DSS) actions. ADSS is required for all Type II Shelf Life Items (and may be

required for a Type I).

7 - Statistical Process Control (SPC)

Contractor is required to use SPC procedures. SPC is an element of a process improvement system that provides a way of statistically monitoring and controlling processes of manufacturing through the concept of "continuous quality improvement." This requirement is established by Supplemental Quality Assurance Provision (SQAP) not a DSCC clause.

8 - Quality Evaluation Program (QEP)

QA personnel have established a NSN Quality History in the Quality Evaluation Program (QEP).

9. CIM/IMQIP

9 - CIM/IMQIP

This NSN is identified to the Navy Controlled Industrial Material (CIM) program NSNs that are under the Industrial Materiel Quality Improvement Program (IMQIP).

M - Military Specification-This NSN is control by a Military Specification.

Q - Quality Assurance Provision-A Quality Assurance Provision is required.

R - Receiving Inspection Testing-This NSN is recommended for consideration in the Receiving Inspection Program. Contact QA Personnel for more information.

T - TRI-STAR Testing-This NSN is recommended for consideration in the TRI-STAR Program. Contact QA Personnel for more information.

X - No Testing (Receiving/SQA/PVP)-This NSN has a good Quality History and is in a critical supply need. Testing should only be performed at the request of the QA Personnel.

Z - Two or More Quality Specific Requirements-The multiple quality specific requirements are listed in the Contract Technical Data File (CTDF), Option N, in-the-clear tests field.
